

MED-CURE™

A Concrete Curing Aid Specially Formulated to Supplement LIQUI-HARD Concrete Densifier

MED-CURE and LIQUI-HARD are designed to work together to provide tough, durable, long-lasting concrete floors.

Since 1926, W. R. MEADOWS has been a leader in developing products that protect, harden, and dustproof concrete surfaces. From decorative concrete to roads, bridges, and in-between, issue-specific products target and prevent potential, costly problems. Today, patented technologies enable more environmentally effective, efficient designs, and our products contribute to LEED certification. With nine manufacturing facilities throughout the U.S. and Canada, the materials you need are within easy reach.

When using our LIQUI-HARD and LIQUI-HARD ULTRA concrete hardener and densifier products, the concrete surface should be cured effectively and efficiently before LIQUI-HARD is applied. For optimal results, make sure to use MED-CURE curing aid to make your LIQUI-HARD application a complete success.

MED-CURE concrete curing aid was specially formulated to supplement the LIQUI-HARD line of concrete hardeners and densifiers. MED-CURE is ideal as a concrete curing aid for LIQUI-HARD applications to prepare the surface for the next step of the densifying process. MED-CURE and LIQUI-HARD work seamlessly together to create a pure, sustainable, durable concrete surface that will last for years to come.

FEATURES/BENEFITS:

- Penetrates to aid curing for all LIQUI-HARD applications.
- Provides a finished surface for the next step of the LIQUI-HARD process.
- Does not require removal prior to LIQUI-HARD application.
- Ideal for new, old, interior, exterior, and horizontal concrete.
- Dries fast.
- Application tools may be cleaned with water.
- VOC compliant ... actual VOC content is 0.
- Can also be used for dustproofing new concrete (after 28 days) or existing concrete.
