

NEW @ W. R. MEADOWS

Featured Product Highlights

PC2R PROTECTION COURSE

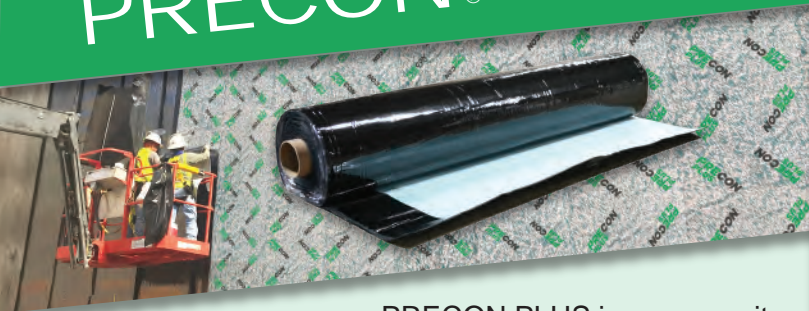

PC2R PROTECTION COURSE is a 94 mil (2.4 mm) thick SBS (styrene-butadiene-styrene) modified bitumen protection course. The product consists of a fiberglass mat saturated and coated with an asphaltic and SBS elastomer blend.

AIR-SHIELD™ BUTYL FLASHING

AIR-SHIELD BUTYL FLASHING air, vapor, and liquid moisture barrier is a primerless, composite membrane that is comprised of a black woven polyethylene facer and easy-to-release kraft paper release liner.

PRECON® PLUS

PRECON PLUS is a composite sheet membrane comprised of a polyolefin film, elastomeric membrane, and W. R. MEADOWS' exclusive, patented seven-layer matrix PLASMATIC CORE designed for toughness and provides the lowest water vapor transmission (WVT) rating on the market.

PENCURE™ OTC

PENCURE OTC is a unique, dual-action, non-yellowing, acrylic, concrete curing and sealing compound containing silane. PENCURE OTC simultaneously forms a membrane as well as chemically react to reduce the intrusion of water and salts into the concrete.

CEM-KOTE™ CW PLUS

CEM-KOTE CW PLUS is a one-component, Portland cement based coating containing silica-based materials that forms insoluble calcium silicate crystals which "plug" the capillary pores and water-proofs the concrete while allowing water vapor to pass.

ADI-CON™ CW PLUS

ADI-CON CW PLUS is a dry, free-flowing powder with chemically-active materials that react with lime generated by the hydration reaction of cement to plug the capillary porosity, making concrete watertight under water-head pressure.
