

NEW @ W. R. MEADOWS

Featured Product Highlights

FINISH-ASSIST® PRO

- Ready-to-use, colloidal silica-based finishing & troweling aid
- Improves concrete workability during placement
- Enhances surface finish and finishability during troweling

AIR-SHIELD™ STPE

- Single-component, moisture-cured, fluid-applied air and liquid moisture barrier
- Forms a tough, seamless, elastomeric membrane when cured
- Silyl-Terminated Polyether (STPE) technology for strength and durability

AIR-SHIELD™ HT

- High-temperature, self-adhering transition & flashing membrane
- Flexible design for reliable detailing and transitions
- Cross-laminated polyethylene bonded to modified asphalt for elevated-temperature performance

REZI-WELD™ 360

- Self-leveling, 100% solids, two-component polyurea joint filler
- Heavy-duty, semi-rigid formulation for industrial concrete floors
- Designed to fill and protect control, contraction, and construction joints

HYDROWRAP PUMA FLASHING

- Fast-curing, liquid-applied flashing and detailing membrane
- Advanced PUMA technology for durable, flexible water proofing
- Cold-weather cure down to 15 °F (-10 °C) with resistance to cracking, water, and chemicals

Featured Product Highlights

TILT-CRETE™ W/B

- High-performance, water-based bond-breaker for tilt-up construction
- Low-VOC, proprietary organic formulation in an aqueous dispersion
- Dual-action, film-forming and reactive properties for clean panel separation
- Functions as both a cure and bond-breaker for tilt-up, lift-slab, and precast concrete

PERMINATOR® (20 MIL)

- New-generation, polyolefin-based underslab vapor barrier technology
- Helps reduce moisture and water vapor penetration through concrete slabs
- Assists in minimizing fungus, mildew, and mold growth
- Helps limit radon gas entry into the structure

WATERSTOP HPW

- Hydrophilic swell strip made of synthetic rubber
- Expands when exposed to water for watertight sealing
- Designed for non-moving construction joints and penetrations
- Delivers long-term performance over the life of the structure

WATERSTOP LIQUID HPW

- One-component, gun-grade polyurethane sealant
- Swells up to 500% when exposed to water for reliable water-stopping
- Hydrophilic material designed for construction joints and penetrations
- Pre-applied negative-side backup waterproofing if primary systems fail
